

Bronze, Brass, Cast Iron, Butterfly and Stainless Steel Valves

Toyo Valve

Notes

- 1) Refer to individual specification sheet and/or the drawing for details of the product.
- 2) Main units of this catalog are shown in SI (MPa, °C, millimeter).
- 3) Refer to the attached P-T ratings for applicable pressure and temperature.
- 4) Non-asbestos product is used for gland packing and gasket for bronze, brass and cast iron valves as manufacturer's standard. Please consult with KITZ representative for other materials.
- 5) Bronze and cast iron strainers have perforated metal screen equivalent to 12-16 meshes. Other meshes on screen are also available upon request. Please consult with KITZ representative for details.
- 6) Legends
 - d: Port diameter(mm)
 - (L, H, D: shown on each page)
- 7) Teflon is Du Pont's tradename.

Products guarantee

Term of Guarantee: Within twelve (12) months after shipment from the factories of KITZ Corporation.

Exception of guarantee: For the following reasons, articles of guarantee in the above will not apply.

- 1) Non-compliance to the technical instructions furnished in the catalog and specification sheet
- 2) Natural disaster incidents, such as fire, flood, earthquake, and falling stone
- 3) Reconstruction or repair by any third party other than KITZ Corporation.
- 4) Deterioration (such as shot rust, degradations, chemical changes, etc.)
- 5) Any other damages not being regarded as manufacturer's responsibility

In addition, you will be required necessary charge for repair or exchange of parts on failure or damage by the guarantee exceptions. Please contact our sales staff or agency for details.

The specification and the performance term of our product indicated in this catalog are based on the internationally governed standards and specifications, our products experience or the design calculation and our in-house examination.

When using the product beyond the service conditions mentioned in this catalog, users are requested to consult KITZ Corporation for further advice in advance, or to conduct the verification or evaluation for the performance under users' responsibility. We shall not be liable for any damages resulting from lack of aforementioned procedures by the customer.

Products in this catalog are subject to change without prior notice to the customers. Do not use our products in flammable or toxic gas services.

722A	300-SSRF	2–6	Class 300	Gate (Outside Screw)	Flanged (Class 300)	Hard Faced (Seat only)	-
710A	150-SGF	2–6	Class 150	Globe	Flanged (Class 150)	Hard Faced (Seat only)	-

PRODUCT CODING

1. Bronze/Brass gate, globe, check valves & strainer

1.1 Product Coding (for Bronze gate/globe/check & strainer)

L **125** **E** **B** **S** **NR** **NPT** **<UC8R1>**

1 2 3 4 5 6 7 8 9

1 Standard or Lead free material

J JIS Standard
L Lead free material
None Others

2 Class

5 5K
10 10K
125 Class 125
150 Class 150
300/N300 Class 300

3 Series

E E series
N Nseries
C Cseries
H H series
S S series
None Others

4 Shell materials

B Bronze
R Brass

5 Valve type

G Globe
NS Swing Check
O Ball Foot
S Gate (NRS)
SR Gate (RS)
SRU Gate (RS, Union Bonnet)
D PTFE seated Globe
N Lift Check
DNS PTFE seated Swing Check
DR(S,L,LS) Fancoil
L Angle
T Strainer
NW Wafer Check

6 End Connection

F Flanged
-SE Solder

7

NR New design
N New design
R New design

1.2 Out of product coding (for Bronze or Brass gate)

(1) Class 125/PN16, Bronze Gate valves

H-BS-N(CAC406)
H-BS(B62)PN16-
H-BS-N
H-BS-PN16-

(2) Class 125, Brass Gate valves

RH-N
RH-NR-NPT<UL1R2>

8 Others

NPT NPT
F150H- Class 150 Flanged ends
F150- Class 150 Flanged ends
PN25- PN25
PN16- PN16
PF BSP
B62- B62 Body/Disc

9 Package code

UC8R1 Red White
UL1R1 Red White (PH)
UL1R2 Red White (PH) but red handle
UL1R3 Red White (PH) w/trustgram
EG1R1 Red Yellow
ZS2R1 Red White (PH)
Z01R1 Red White
Z01R2 Red White (PH)
Z01R3 Red White (PH) w/trustgram

2. Bronze/Brass ball valves

2.1 Product Coding (for Bronze ball)

B **O** **X-N** **T**

1 2 3 4

1 Shell materials

B Bronze

2 Class

O Full bore
None Standard bore

3 Neck type

X-N Long neck
None Standard neck

4 Operator

T T handle
None Lever

2.2 Out of product coding (for Brass ball)

(1) Class 600, Brass ball valves, Full bore

600RC-N
600RC-NR-NPT<--->
600RC-N-T
600RP-LL-R-NPT<--->
600RP-LL-R-316-NPT<--->

Pressure-Temperature Ratings

Ball Valves

Unit: MPa

Class	WOG38 (3°F)	Test shell (water)	pressure seat (air)
400WOG	2.75	4.12	0.6
600WOG	4.12	6.18	0.6

Do not use products in flammable or toxic gas.

Solder

Joint material	Working temperature		Maximum working gage pressure			Test pressure	
	°C	°F	1/8" thru 1" MPa	1 1/4" thru 2" MPa	2 1/2" thru 4" MPa	shell water	seat air
ASTM B32 Alloy Grade 50A [Notes(1),(2)]	38	100	1.37	1.20	1.03	2.07MPa	0.6MPa
	66	150	1.03	0.86	0.68		
	93	200	0.68	0.62	0.51		
	121	250	0.58	0.51	0.34		
ASTM B32 Alloy Grade 95TA [Note(2)]	38	100	3.44	2.75	2.06		
	66	150	2.75	2.41	1.89		
	93	200	2.06	1.72	1.37		
	121	250	1.37	1.20	1.03		

Notes: (1) Safe Drinking Water Act Amendment of 1986 prohibits the use in potable water systems of any solder having lead content in excess of 0.2%.

(2) Safe working pressure-rating for solder end valve is restricted lower pressure-rating.

a) Shall be the maximum service temperature and in case of gate valves, it shall be 134°C

b) Shall be the maximum service temperature and in case of globe valves it shall be 171°C

c) Maximum permissible pressure at intermediate temperature between temperature above 120°C and maximum service temperature which shall be obtained by proportional interpolation.

JIS Standard Valves

Bronze Gate, Globe and Check Valves (JIS B2011)

1. Fluid

Water, oil, gas, air and steam. However, flammable gas and toxic gas are excluded.

2. Relationship between the temperature of the fluid and the maximum permissible pressure (hereinafter referred to as the "pressure-temperature criteria") shall be in accordance with Table 1. However, the fluid shall not be frozen.

3. In case where the use of valves is prohibited, restricted by High Pressure Gas Safety Act or other regulation, user shall properly use the product within framework of laws and ordinances.

Nominal pressure	Temperature of fluid (°C)	Max. permissible working temp. ^{a)} (MPa)
5K	-29 to 120 159 ^{a)}	0.7 0.5
10K	-29 to 120 185 ^{b)}	1.4 1.0

Gray Cast Iron Gate, Globe and Check Valves (JIS B2031)

Pressure-Temperature Ratings

Rubber Seat

Note: Maximum allowable working pressure is affected by the coupling flange when installing a valve with JIS 5K flanges.
 Static water flow : 0.7 MPa
 Pulsated water flow : 0.6 MPa

• Application of Pressure-Temperature Rating

- (1) This diagram is based on maximum allowable working pressure and temperature, pressure-temperature characteristics of EPDM in JIS B2032 (Wafer type rubber-seated butterfly valves). In actual application, it is necessary to expect safety allowance in consideration of piping design conditions, etc.

Generally, the following safety allowance is recommended.

- For large size
10 - 15%.
- For pulsated flow or steam (Teflon® or metal seat)
20 - 25%.

- (2) In case of applying some regulations, such as Japanese government standards, etc., it may be restricted in material, temperature, design, strength, etc. Beforehand, please refer to related regulation or standard.
- (3) In JIS B2032, the maximum allowable flow velocity of fluid when the valve is fully open is specified as 3m/s at nominal pressure of 10K and 4m/s at nominal pressure or at 16K and 30m/s in case of gas. If flow velocity exceeds the above criteria, the pipe diameter should be amended.

Caution

1. Rubber seat (NBR/EPDM) may deteriorate at early stage in service of hot water supply line.
2. EPDM seated butterfly valve shall not be used for any oil applications.

VA-Series Stainless Steel Valves

JIS Flanged Valves

Unit: MPa			
Nominal pressure		10K	20K
Body material		SCS13A, SCS14A	SCS13A, SCS14A
Temperature	below 120°C	1.4	3.4
	220°C	1.2	3.1
	300°C	1.0	2.9
	350°C	—	2.6
	400°C	—	2.3
	425°C	—	2.0

Notes:

- 1) Max. working temperature for standard products is restricted to 260°C by gland packing, gasket or material.
- 2) In case of use in 260°C and above, proper selection of gland packing and gasket is required.
- 3) Do not use our products in flammable or toxic gas service.

Note:

- (1) Applicable to valves with butt welded end only. Limited to 528°C (1000.4°F) for flanged end valves.
- (2) Permissible, however, please consult with KITZ representative or agent for use above 450°C

Pressure-Temperature Ratings

10/20K, Class 150/300 Stainless Steel Flanged Ball Valves

A10-UBF-L(3011L)

Wafer Check Valves Rubber Seat (with Bypass-Valve)

Fig. 10-UNW (806), 10K Unit: MPa

Seat material		NBR	FKM	EPDM
Service conditions				
Static water	below 80°C	1.4	1.4	1.4
	above 120°C	—	—	1.4
Oil, water, air	below 80°C	1.0	1.0	1.0
	above 120°C	—	1.0	1.0

Note: An EPDM seat shall not be used for any oil application.

CAUTION

Pressure-temperature ratings and other performance data published in this catalog have been developed from our design calculation, in-house testing, field reports provided by our customers and / or published official standards or specifications. These data apply only to typical applications and are provided as general guidelines to users of KITZ products introduced in this catalog.

For any specific application, users are kindly requested to contact the KITZ Corporation for technical advice, or to carry out their own study and evaluation to ensure the suitability of these products for such an application. Failure to follow this request could result in property damage and / or personal injury for which we shall not be liable.

While this catalog has been compiled with the utmost care, we assume no responsibility for errors, impropriety, or inadequacy. Any information provided in this catalog is subject to change without notice for error rectification, product discontinuation, design modification, new product introduction, or any other cause that the KITZ Corporation considers necessary. This edition cancels all previous issues.

NOTICE

If any products designated as strategic material in the Foreign Exchange and Foreign Trade Law, Cabinet Order Concerning Control of Export Trade, Cabinet order Concerning Control of Foreign Exchange and other related laws and ordinances ("Foreign Exchange Laws") are exported to any foreign country or countries, an export license issued by the Japanese Government will be required under the Foreign Exchange Laws.

Furthermore, there may be cases in which an export license issued by the Government of the United States or the government of another country will be required under the applicable export-related laws and ordinances of that country.

The contract shall become effective subject to a relevant export license being obtained from the Japanese Government.
